

Statement in Support of Library Funding

The Florida Library Association supports quality library services and adequate library funding on local, state and federal levels. Adequate funding is essential for libraries of all types to provide those services needed by the people they serve. To meet the needs of their communities appropriately, all libraries need core resources, including trained staff, facilities, collections and technologies. For public libraries, these resources are described as *essential*, *enhanced* and *exemplary* levels of services in [Florida Public Library Standards](#).

Adopted by FLA Executive Board, April 8, 2011
